

REQUIREMENTS

Hardware

*Minimum requirements of hardware needed
to electronically file, view and retrieve case documents are:*

IBM-compatible

- Pentium processor-based personal computer, with 16 MB of RAM (24 for Windows NT), with 40 MB of available hard disk space and a Windows 98 or Windows NT operating system
- CD-ROM drive or 3.5" diskette drive (NOTE: Adobe sells the Acrobat software on CD-ROM only. If you desire the diskette software, you must complete the request provided with the software and forward, together with \$25.00, to Adobe)
- Modem, 56K (or faster) or other Internet Access device
- Scanner and scanner software, for conversion and transmission of documents not in a word processing system

Macintosh

- Macintosh with a 68020 processor or Power Macintosh, with 16MB of available RAM, and 40 MB of available hard disk space
- Apple System Software version 7.1.2 or later
- CD-ROM drive or 3.5" diskette drive (NOTE: Adobe sells the Acrobat software on CD-ROM only. If you desire the diskette software, you must complete the request provided with the software and forward, together with \$25.00, to Adobe)
- Modem, 56K (or faster) or other Internet Access device
- Scanner and scanner software, for conversion and transmission of documents not in a word processing system.

REQUIREMENTS

Software

- Adobe Acrobat software 4.0 or later (Acrobat Reader and Acrobat Writer) to convert documents from word processing format to PDF (Portable Document Format)
- CM/ECF has been tested and is compatible with Netscape version 4.6x or 4.7x. Upgrades can be downloaded free of charge from the Netscape website @ www.netscape.com/download/archive.html. Do not upgrade to Netscape version 6.0. CM/ECF has also been tested and is compatible with Internet Explorer version 5.5 and higher.
- An Internet Service Provider (ISP), using point-to-point protocol (PPP). Minimum connection speed of 56kps. DSL or Cable Modem preferred.
- Antivirus Protection Software. It is recommended that the virus-protection software have a “Live Update” feature that will automatically download new virus definitions when it detects they’re available.

[NOTE: Connection can be made at speeds less than the recommended 56kps, however, system performance may be less than optimal (*i.e.* slow response time and access)]
